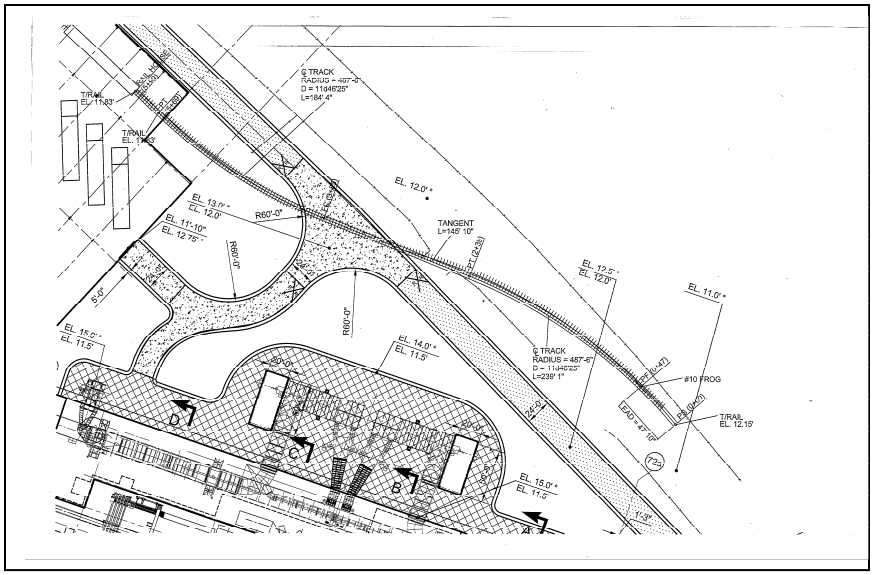
RAIL IMPROVEMENT FOR PLANT EXPANSION

NORFOLK, VIRGINIA

US Gypsum Plant in
NORFOLK, VIRGINIA

This project consisted of the planning for construction documents for a new rail spur line servicing new plant addition at the USG gypsum board plant facility in Norfolk, Virginia.


Scope included planning for construction of a new 1,000’ long spur, including 115# rail, a 2-gate roadway crossing signal, #10 turnout, manual switch and crossover. Spur connection was with Norfolk Portsmouth Belt Line.
