

FIRE SPRINKLER, ALARM SYSTEM, AND VOICE COMMUNICATION DESIGN METRA RAILROAD

Metra - 547 W. Jackson Blvd.

HOH provided design drawings and specifications for the installation of fire sprinkler system retrofit including 5 clean agent systems, and fire alarm voice communication system for 547 W. Jackson Blvd. building. The use of quick response and quick response extended coverage reduced the number of sprinkler heads by 25%. The clean agent fire suppression systems with early detection and pre-action sprinkler systems were installed in the telecommunication and main computer room.

This project was completed under budget and within one year. By working 2nd shift, there was little interruption to the tenants of the building.
