

SIMEON CAREER ACADEMY COMMUNICATION and LIFE SAFETY INFRASTRUCTURE CHICAGO PUBLIC SCHOOL SYSTEM

The Chicago Public School Systems selected HOH as the Architect of Record for the new Neal F. Simeon Career Academy located at 8147 S. Vincennes Avenue, Chicago, Illinois. The project entailed design of a new 217,000 square-foot facility to educate 1,700 students for a career in high technology. The project consisted of three phases. The first phase was construction of the new school. The second phase was the demolition of the old school. The final phase was to connect the new school with the existing Physical Education (PE) building and extend system services into the existing PE building. HOH Architects had total design responsibility, which included the design of:

- Fire Protection Systems for both the new school and the existing Physical Education building.
- Fire Alarm System for both the new school and the existing Physical Education Building
- Intercom and Paging System.
